Dr. Hsieh Tsung-Shun, Department Head of Education

Dr. Lee Shih-Pin, Department Head of Public Health

Dr. Liao Boi-Yee, Department Head of Engineering

Dr. Hsieh Ming-Hsun, Department Head of Laws

Peer Review Policy

The Chair of conference committee members approves manuscripts submitted to the conference. After that, a formal peer review is conducted in collaboration with committee members and independent referees worldwide. The committee exploits an electronic peer-review system to contact reviewers and keep records of manuscripts.

Peer Review Process

Papers submitted to the conference must pass a double-blind review process. Two suitable experts in the respective subject area will review the manuscript. The reports of both reviewers will be considered while deciding on a manuscript's acceptance/revision or rejection.

To present at the conference, the manuscript should meet the criteria below:

- 1) The study presents the results of primary scholarly research.
- 2) Reported results have not been published elsewhere.
- 3) The research meets all applicable standards of ethics and research integrity.
- 4) Experiments, statistics, and other analyses were performed to a high technical standard and described in sufficient detail.
- 5) Conclusions are presented in the appropriate form and are supported by the data.
- 6) The article is presented in an intelligible fashion and is written in standard English.
- 7) Once a manuscript passes quality control, it is assigned to a member of the editorial board (or an expert in the field who will become a guest editor) to conduct the peer-review process for deciding on accepting, minor revision, major revision, or rejection of the article.

Manuscripts Form:

Please use the APA 6th edition reference or the template to submit your manuscript.
